

# NOW OFFERING SOIL FERTILITY TESTING SERVICES

Quick Turnaround and Local Expert Recommendations

NEWS RELEASE

August 14, 2024

## Woods End Laboratories Launches Comprehensive Soil Fertility Testing Services

Woods End Laboratories is thrilled to announce the expansion of its services to include soil fertility testing.

As a renowned leader in soil health analysis, Woods End Laboratories is now equipped to provide farmers, agronomists, and ag retailers with unparalleled insights into soil nutrient composition, aiding in optimized fertilizer applications, crop productivity and sustainable land management practices.

Celebrating 50 years in business this year, Woods End Laboratories brings a wealth of knowledge and precision to its new soil fertility testing offerings. Through advanced laboratory techniques and state-of-the-art equipment, the company ensures a **Quick Turnaround and Local Expert Recommendations**, empowering clients with actionable data for informed decision-making.

"We are excited to introduce our soil fertility testing services, furthering our commitment to advancing agricultural and environmental sustainability," said Rebecca Harvey, CEO of Woods End Laboratories. "By leveraging our expertise and the latest technologies, we aim to support our clients in maximizing soil health and productivity."

Woods End Laboratories' soil fertility testing encompasses a comprehensive analysis of essential nutrients, including nitrogen, phosphorus, potassium, and micronutrients crucial for plant growth and development. The company's team of skilled scientists and technicians work diligently to deliver precise recommendations tailored to each client's specific soil needs, promoting efficient resource utilization and environmental stewardship.
