100P **Premium Soil Health Analysis:** Includes Basic Soil Health test plus: P in CO_2 Carbonated Water and K, Na, Ca, Mg, Storage P in Mehlich Extract, pH, C:N ratio (with choice of soil OM or TC, or both)

100W **Basic Soil Health Analysis:** Solvita CO_2-Burst, Solvita SLAN, VAST (Aggregate Stability), WSOC, Nitrate, C:N, Respirant Quotient

108 **Complete Fertility:** Basic Fertility + Ca, Na, Al, Cu, Zn, B, Fe

115 **Basic Fertility:** pH, P, K, Mg, CEC, est. OM, lime recommendations

For an overview of our soil test offerings, see page 2 or visit https://woodsend.com/soil-health-test/ ***Filling out this form constitutes a contract agreement for selected services.**

2025 SOIL HEALTH AND FERTILITY ANALYSIS

Please indicate test option(s) on p1 of Sample Request Form.

1. **BASIC SOIL HEALTH ANALYSIS**: **(Code #100w - $55)** – Solvita CO_2 Burst, Solvita SLAN, VAST (Aggregate Stability), WSOC, Nitrate, C:N, Respirate Quotient.
2. **PREMIUM SOIL HEALTH ANALYSIS w/ OM:** **(Code #100P-OM - $75)** – Includes Basic Soil Health Analysis PLUS: P in CO_2 Carbonated Water, K, Na, Ca, Mg, Al, Storage P in Mehlich Extract, pH, C:N Ratio and Soil OM.
3. **PREMIUM SOIL HEALTH ANALYSIS w/ TC:** **(Code #100P-TC - $75)** – Includes Basic Soil Health Analysis PLUS: P in CO_2 Carbonated Water, K, Na, Ca, Mg, Al, Storage P in Mehlich Extract, pH, C:N Ratio and Soil Total Carbon.
4. **PREMIUM SOIL HEALTH ANALYSIS w/ OM/TC:** **(Code #100P-OM/TC - $85)** – Includes Basic Soil Health Analysis PLUS: P in CO_2 Carbonated Water, K, Na, Ca, Mg, Al, Storage P in Mehlich Extract, pH, C:N Ratio, Soil Organic Matter and Total Carbon.
5. **BASIC FERTILITY:** **(Code #115 - $20)** – pH, P, K, Mg, CEC, est. OM, lime recommendations.
6. **COMPLETE FERTILITY:** **(Code #108 - $30) –** Basic Fertility PLUS: Ca, Na, Al, Cu, Zn, B, Fe.

7. **ADDITIONAL OR INDIVIDUAL TESTS:**

- **TOTAL CARBON (Code #100 TC - $20):** Total Carbon by dry combustion.
- **TOTAL NITROGEN (Code #100 TN - $15):** Total Nitrogen by dry combustion.
- **TOTAL ORGANIC CARBON (Code #113 - $25):** Total Organic Carbon (Measurement of Total Carbon and Total Inorganic Carbon).
- **WATER SOLUBLE ORGANIC CARBON: (Code #111 - $25):** WSOC by combustion.
- **ACTIVE CARBON (Code # 135 - $30):** Active Carbon by POx-C method.
- **SOIL TEXTURE (Code #124 - $25)**: Soil texture by hydrometer and wet sieving.
- **MICRONUTRIENT ANALYSIS (Code #190 - $35)**: B, Fe, Mn, Zn, Cu on ICP (if add to Premium Soil Health, $20).
- **VAST (Code #100V - $15)**: Volumetric Aggregate Stability Test.
- **SLAN (Code #105A - $25):** Solvita SLAN, read by Digital Color Reader.
- **BASAL (Code #105B - $25):** Solvita Basal Respiration test, read by Digital Color Reader.
- **CO_2 BURST (Code #105C - $25):** Solvita CO_2 Burst Respiration test, read by Digital Color Reader.
- **CO_2 BURST / SLAN (Code #105D - $40):** Solvita CO_2 Burst Respiration & Solvita SLAN tests, read by Digital Color Reader.
- **HEAVY METAL ANALYSIS (Code #185 - $150):** Cd, Cu, Pb, Ni, Zn, Hg, As, Se (by hot acid digestion).
- **IRTH: Multi-day respiration (Code #106 IR - $125):** Multi-day CO_2 Respiration, 24 hours up to 4 days-1 reading. For a longer time period, please inquire.
- **PFAS testing using MOD 537 (Code #211a - $450):** for solid sample matrices, cetified by MLAP and NH ELAP (30 PFAS compounds)
- **PFAS testing using EPA 1633 (Code #211b - $525)**: for solid sample matrices, certified by MLAP and NH ELAP (40 PFAS compounds)

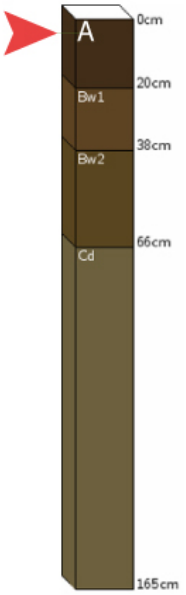
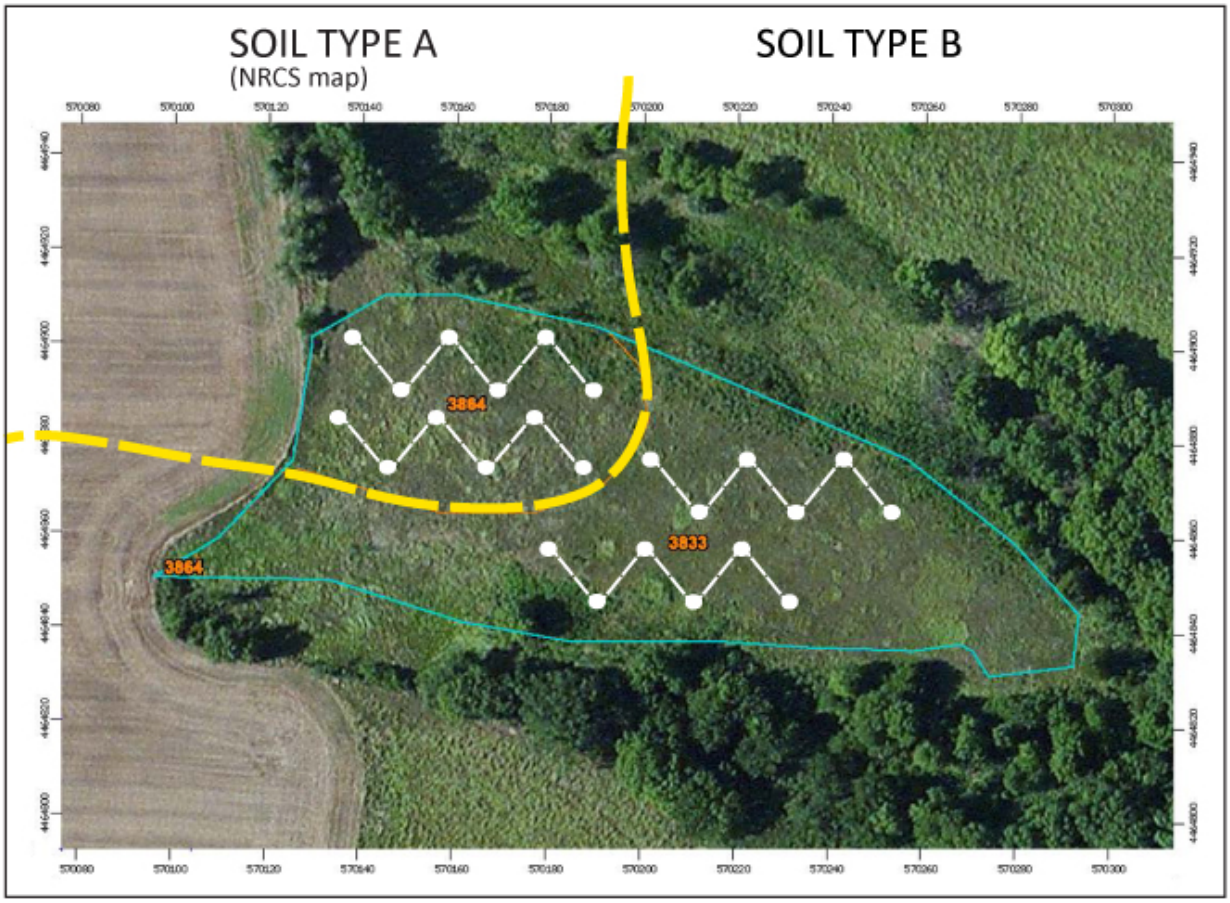
HOW TO SAMPLE SOIL FOR TESTING



TO COLLECT A REPRESENTATIVE SOIL SAMPLE: The area sampled should be fairly uniform. As many sub-samples as possible should be taken. If the field is uneven, has differing soil types, or differing management, it is wise to break the area into separate samples. *It may be helpful to consult a soil map to locate soil type boundaries- see links below for online maps. We will provide this service to you in advance if you wish.* If Grid Sampling is used some of this natural variation is segmented into smaller blocks but each block must be thoroughly sub-sampled. The example below from an actual soil map shows how to split sampling a field with two soil types. Within each zone, select a minimum of 12 locations (dots shown on map). Take a topsoil sample at each point (A-Horizon - see figure right from soil app). *In some cases, sampling the "sub-soil" or B-horizon is also useful; this should be separately marked*. Mix the individual soils well from all sub-samples within each area and combine into one sample of about 1-pint to fill a soil sample bag. Place it in a container for mailing. INDICATE DEPTH THE SAMPLE WAS TAKEN AND THE TYPE OF TOOL USED TO OBTAIN THE SAMPLE.



MAP - NRCS SOIL MAP TOOL: http://websoilsurvey.sc.egov.usda.gov/App/HomePage.htm
